Address
hyderabad, india

Education

2023 - 2027
BTech, Computer Science
Aar mahaveerengineering College

2021- 2023
Intermediate
Narayana Institute

Skills

- Machine learning
- Cybersecurity
- Artificial Intelligence
- python
- prompt engineering
- soft skills

Language

English

Hindi

About me

Proactive B.Tech Computer Science student specializing in Cybersecurity, driven by a missionto fortify digitalinfrastructure and mitigate emergingthreats. I am currently deepening my expertise in network security, including SIEM tools (e.g., Splunk/ELK), Python scripting for automation, and threat intelligence.

My practical experience includes performing exploratory data analysis on security logs for vulnerability identification and implementing data monitoring protocols (as demonstrated in my Cyber SecurityAnalyst project/internship). I am proficient in securing both cloud and on-premise environments.

I am activelyseeking a SummerInternship or Entry-Level Analyst role where I can leverage my technical foundation and contribute to a robust security posture. Let's connect on fortifying the next generation of enterprise networks.

Certifications

- Introduction to the ThreatLandscape 3.0
- AIML
- Introduction to Cybersecurity
